**Quality Value Experience Service Excellence Tradition**

“CORE Building Company has always done Parker Poe’s construction work including an expansion to our own space. We outgrew our space and because of our high satisfaction with previous projects CORE had completed for us, as well as their customer service, we knew they would be right for the job. Their work has always been very good.”

Kathy Ward  
Parker Poe

“I was looking to work with a company that would be honest and on time – both of which CORE did. I received exceptional results from them. The team at CORE is truly great and I would recommend them, and have recommended them, without any reservations.”

Dr. Kevin Neshat  
Nu-Image Surgical Center

“I had worked with other contractors in the past and was frustrated with them. In choosing to work with CORE Building Company, I was looking for professionalism, a “watch out for my client’s best interests” mentality, competitive pricing, responsiveness to me, my company and our tenants. CORE seemed like a hard-charging, stream-lined and aggressive contractor wanting to prove themselves on all of these points. The results of using CORE have been wonderful. They have helped make me and my company achieve great success with regards to being competitive on interior up-fits, managing clients’ expectations, creating new ideas to save time and money as well as improve results and various other intangibles that help us be a market leader in commercial real estate.”

Bret Muller  
Capital Associates

“We hired CORE Building Company due to the immediate response to our request and Dan Flatten’s attention to our needs. We were looking to CORE to provide design ideas, guidance, the best and most economical ways to meet our needs, and how to best perform the work for a major office renovation. CORE has been instrumental in the success of this project.

Bill Price  
Crawford Sprinkler

“When we hired CORE Building Company, we were looking for quality, price and delivery. They completed everything they were contracted for perfectly. The project they completed for us was complicated by the fact that it was fast tracked and required them to work through the Thanksgiving and Christmas holidays. Even with the holidays, CORE delivered our Certificate of Occupancy on time and on budget.”
